[Data center cooling has changed more in the last five...](#)

[Data centers as critical infrastructure in the Arctic](#)

[Bangalore: Vertiv, formerly Emerson Network Power, today released six data center infrastructure trends to watch in 2017. "We're moving further into the cloud era and that creates challenges..."](#)

[Emerging Trends in Infrastructure - KPMG Global](#)

[Infrastructure and operations \(I&O\) is becoming increasingly involved in unprecedented areas of the modern-day enterprise. The focus of I&O leaders is evolving far beyond technology elements like data centers, colocation and the cloud to instead encompass more about how an organization's I&O can support and enable business strategy.](#)

[Data Center Trends: 2017 in Review | RackSolutions Blog](#)

[Enterprises with older data centers don't want to rebuild them or build new ones due to high capital costs. They would rather have someone else manage the physical infrastructure. Gartner's 2019 IT Key Metrics Data shows that the percentage of the IT budget spent on data centers has decreased over the past several years, and now accounts...](#)

[Shifting into an era of repair: US infrastructure spending...](#)

[This is the third entry in a Data Center Frontier series that explores how to create complete resiliency and compliance for mission critical data centers. Focused on the changing role of data center management, this post explores how a data center partner for your critical environments must be able to provide advanced facilities management, operational control, managed services, and a team...](#)

[Data Center Infrastructure Trends 2017 - Global IP Networks](#)

[The data center market has had some fantastic growth in 2017 with major players looking ahead for the future trends regarding cloud policy, Cloud as a Service, and a greater migration towards the Internet of Things. Here is our "Top Five Emerging Data Centre Trends": 1. Global Policy](#)

[Investors See Data Centers as Critical Infrastructure for...](#)

[Data center managers know the winds of change are blowing in their direction. While traditional data center management—presiding over a company's own servers, storage, networks and other infrastructure—isn't dead, it's becoming far less integral to the day-to-day job of IT, experts say. By 2021, 94% of workloads and compute instances will be processed by cloud data centers: 6% will...](#)

[Top Emerging Data Center Trends for 2017 and Beyond...](#)

[2017 Trends in Infrastructure. Enterprises and service provider customers have more storage, networking, and cloud technology choices at their disposal than ever before, and aggressive technology adopters will gain a performance and agility edge over their rivals in 2017.](#)

[DEC 2018 2019 Trends in Datacenter Services & Infrastructure](#)

[The global data center market will transform over the next few years as companies modernize their data center facilities, shift to more software-defined infrastructure, and adopt more autonomous...](#)

[Critical Infrastructure Cybersecurity Trends and Compliance](#)

[Data center assets need to be deployed in an agile manner to support the business. As trends and markets rise and fall, a modern data center physical infrastructure requires both flexibility and constant connectivity. Innovations such as pre-fab data centers and micro data centers are designed with flexibility in mind.](#)

[3 Trends that Will Drive the Future of Data Centers](#)

[Data Center REITs - the physical epicenter of the cloud - continue to ride the substantial secular tailwinds behind the "big-data and cloud computing boom, surging nearly 50% in 2019.](#)

[Critical Infrastructure Trends in the Edge2Core Data Center](#)

[Modular Data Centers Adoption Is on the Rise. For a while now, we've heard a lot of talk about modular data centers, yet there hasn't been much in the way of adoption. 2016 is finally starting to see that change and a solid prediction for 2017 is that this will only continue.](#)

[IT Infrastructure Trends and Predictions for 2017 by StorPool](#)

[Today, there are 7 technology trends that are influencing the way data centers are monitored: Embedded sensing devices – The volume of devices embedded in data center power and cooling equipment has increased 300% over the last ten years. Prices of these sensors have dropped while quality has risen.](#)

[Top Trends in Critical Infrastructure Threats & Security](#)

[This Report was created to help New Hampshire understand the state of our infrastructure. As civil engineers, our job is to plan, design, construct, and maintain our infrastructure networks, and the ASCE-NH 2017 Report Card provides an opportunity to share that information with the public.](#)

[US Policy Response to Cyber Attack on SCADA Systems...](#)

[There are 16 critical infrastructure sectors whose assets, systems, and networks, whether physical or virtual, are considered so vital that their incapacitation or destruction would have a debilitating effect on security, national economic security, national public health or safety, or any combination thereof.](#)
